Department of Ophthalmology, Justus-Liebig-University Giessen,
Eye Clinic, University Hospital Giessen and Marburg GmbH,
Campus Giessen,
Friedrichstrasse 18, 35392
Giessen, Germany

At this difficult time for our country, caused by the military aggression of the Russian Federation against Ukraine, we are forced to ask for Your help. Our medical union is the largest medical organization in Ukraine and the main one in Western region in providing emergency medical care. It consists of three hospitals, one of which is a children's hospital. During the year 100 000 patients (250-300 patients every day) get specialized and highly specialized medical care in the abovementioned hospitals.

In the conditions of martial law, we are ready to provide round-the-clock medical care to patients, who have suffered in a result of hostilities and other people who need medical care.

In following days, we await the large number of civil patients with war trauma in our Emergency Eye Clinic. The access to the disposables required for the surgery is limited in our days.

It would be helpful for our clinic to get a support from abroad.

Emergency Eye Clinic cooperates with Military Medical Clinical Center in Lviv, which will be involved in the treatment of soldiers with head and eye injuries and other clinics, which are involved in the treatment of civil people and military.

We ask You to provide humanitarian aid in the form of medical devices, which we need to save lives and health of victims of the military aggression of the Russian Federation against Ukraine. We attach the list and will be very grateful for Your help.
